INVESTMENT OBJECTIVE AND POLICIES OF THE FUND

Investment Objective

The investment objective of the Fund is to aim to achieve long-term capital appreciation.

Investment Policies

The Fund will invest primarily in equity and equity related securities of issuers in the U.S. that the Sub-Investment Manager believes have long-term capital appreciation potential and are expected to grow faster than the U.S. economy. Such securities shall be mainly listed or traded in the U.S.; however, the Fund may invest up to 20 per cent of its Net Asset Value in securities which are not listed or traded in the U.S. The Fund may also invest up to 10 per cent of its Net Asset Value in open-ended collective investment schemes within the meaning of Regulation 68(1)(e) of the Regulations. The Fund may also invest indirectly in such securities for investment purposes through the use of any combination of the financial derivative instruments set forth in this Supplement and the Prospectus, such as options and futures, or otherwise use such financial derivative instruments for investment purposes. The Fund may be leveraged up to 30 per cent of its Net Asset Value as a result of its use of such derivative instruments. The Fund's investment in derivative instruments will be subject to the conditions and within the limits from time to time laid down by the Central Bank.

Using a bottom up approach, the Sub-Investment Manager will seek to select securities it believes to have large end-market potential, dominant business models, and strong free cash flow generation that are attractively priced compared to the intrinsic value of the securities. There are a number of catalysts that might increase a company's potential for free cash flow growth. The Sub-Investment Manager's disciplined, research-intensive selection process is designed to identify catalysts such as: management changes; new products; structural changes in the economy; or corporate restructurings and turnaround situations. The Sub-Investment Manager will also consider a company's operational efficiencies, management's plans for capital allocation, and the company's corporate governance policy. The Sub-Investment Manager believes that sustainable free cash flow return may result in price appreciation for a company's stocks.

The Fund generally holds a portfolio of 25 to 35 securities, although from time to time, the Fund may hold fewer or more securities depending on the Sub-Investment Manager's assessment of the investment opportunities available. The Sub-Investment Manager maintains a diversified portfolio for the Fund representing a number of different industries. Such an approach helps to minimise the impact that any one security or industry could have on the Fund if it were to experience a period of slow or declining growth.

The Fund may invest up to 10 per cent of its Net Asset Value in real estate investment trusts ("REITs") provided that investment in REITs will not have an impact on the liquidity of the Fund. The Fund may also invest up to 10 per cent of its Net Asset Value in open-ended collective investment schemes within the meaning of Regulation 68(1)(e) of the Regulations.

Although not a principal strategy for the Fund, under certain limited circumstances, the Fund may also invest up to 20 per cent of Net Asset Value in debt securities and bonds. Such bonds and debt securities may be rated Investment Grade or below, issued by corporates, governments or public international bodies, and may be denominated in a variety of currencies and issued with either fixed or floating rates. In addition, although not a principal strategy for the Fund, under certain limited circumstances, the Fund may invest in convertible bonds, preferred stocks, and convertible preferred securities, provided that these investments, when aggregated with the Fund's debt securities and bonds, do not exceed 35 per cent of the Fund's Net Asset Value.

The Fund may employ derivatives involving transactions such as trading in futures and options and other derivative instruments for efficient portfolio management (i.e. the reduction of risk, the reduction of costs, or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund as described herein and the general provisions of the Regulations) and for currency hedging purposes subject to the conditions and within the limits from time to time laid down by the Central Bank. A description of the techniques and instruments in which the Fund may invest is set out in the Prospectus in the section entitled "Investment Techniques and Instruments". Investment in warrants shall not comprise more than five per cent of the Net Asset Value of the Fund. The Fund may be leveraged up to 30 per cent of its Net Asset Value as a result of its use of derivative instruments.

Subject to the foregoing the Fund may invest in the securities identified below and described in the Prospectus in the section entitled "Further Information on the Securities in which the Funds May Invest":

To the extent that the Fund's assets are not fully invested in accordance with the objectives set out above, the Fund may invest the remainder of its assets in debt securities with maturities of less than one year, money market instruments, cash equivalents (such as government securities, discount notes, certificates of deposit, bankers acceptances, commercial paper and treasury bills of Investment Grade and which are traded on Regulated Markets worldwide) or may hold cash. The percentage of the Fund invested in such holdings will vary and depend on several factors, including market conditions. For temporary defensive purposes, including during periods of high cash inflows, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or may hold cash. During such periods, the Fund may not achieve its investment objectives.

The Base Currency of the Fund is the U.S. Dollar.

Investment in the Fund is suitable for investors who are seeking long-term capital appreciation, have a long-term investment horizon, are willing to accept a moderate level of volatility and are willing to invest through a complete market cycle.
