## INVESTMENT OBJECTIVE AND POLICIES OF THE FUND

### *Investment Objective*

The investment objective of the Fund is to aim to achieve long-term capital appreciation.

### *Investment Policies*

The Fund will invest at least 80 per cent of its Net Asset Value in a well-diversified portfolio of U.S. equity and equity-related securities of large sized issuers that, at the time of investment, have a market capitalisation within the range of market capitalisation of companies in the Russell 1000<sup>®</sup> Value Index, which the Investment Manager believes have long-term capital appreciation potential. The Fund may invest up to 20 per cent of its Net Asset Value in non-U.S. companies directly, or indirectly, through ADRs, GDRs, or EDRs.

The securities in which the Fund will invest shall include, but not be limited to, ordinary shares or common stock, ADRs, EDRs, GDRs, preferred stocks, convertible shares, convertible preferred stocks, and warrants (provided that investments in warrants shall not comprise more than five per cent of the Net Asset Value of the Fund). The Fund may also invest indirectly in such securities for investment purposes through the use of any combination of the financial derivative instruments set forth in this Supplement and the Prospectus, such as options and futures, or otherwise use such financial derivative instruments for investment purposes. The Fund may be leveraged up to 30 per cent of its Net Asset Value as a result of its use of such derivative instruments. The Fund's investment in derivative instruments will be subject to the conditions and within the limits from time to time laid down by the Central Bank.

Subject to the investment restrictions in Schedule II of the Prospectus, the securities will principally be listed, traded, or dealt in on a Regulated Market in the U.S., although up to 10 per cent of the Net Asset Value of the Fund may be invested in the securities of non-U.S. issuers at any one time whose securities will be listed, traded, or dealt in on any Regulated Market in a member state of the OECD. The Fund may also invest up to 10 per cent of its Net Asset Value in open-ended collective investment schemes within the meaning of Regulation 68(1)(e) of the Regulations.

The Investment Manager will research individual companies and analyse economic and market conditions, seeking to identify the securities that it believes are the best investments for the Fund. The Investment Manager will take a disciplined approach to investing, combining investment strategies and risk management techniques that it believes can help investors meet their investment objective.

The Investment Manager follows a value-oriented investment philosophy in selecting stocks for the Fund using a research-intensive approach that considers factors such as: a security price that reflects a market valuation that is judged to be below the estimated present or future value of the company; favourable earnings prospects and dividend yield potential; the financial condition of the issuer; and various qualitative factors. The Investment Manager may sell a security if it no longer believes the security will contribute to meeting the investment objectives of the Fund. In considering whether to sell a security, the Investment Manager may evaluate, among other things, the factors listed above, the condition of the U.S. economy, the condition of non-U.S. economies, and changes in the condition and outlook in the issuer's industry sector.

The Fund generally holds a portfolio of 30 to 40 securities, although from time to time, the Fund may hold fewer or more securities depending on the Investment Manager's assessment of the investment opportunities available. The Investment Manager maintains a diversified portfolio for the Fund representing a number of different industries. Such an approach helps to minimise the impact that any industry could have on the Fund.

The Fund may employ derivatives involving transactions such as trading in futures and options and other derivative instruments for efficient portfolio management (i.e. the reduction of risk, the reduction of costs, or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund as described herein and the general provisions of the Regulations) and for currency hedging purposes subject to the conditions and within the limits from time to time laid down by the Central Bank. A description of the techniques and instruments in which the Fund may invest is set out in the Prospectus in the section entitled "Investment Techniques and Instruments". The Fund may be leveraged up to 30 per cent as a result of its employment of derivative instruments.

The percentage of the Fund invested in such holdings will vary and depend on several factors, including market conditions. For temporary defensive purposes, including during periods of high cash inflows, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or may hold cash. During such periods, the Fund may not achieve its investment objectives.

The Base Currency of the Fund is the U.S. Dollar.
